RE: Tinas Coma Road Problem

Dear Bob,

On November 15, 2002 the city staff inspected the road problem on the northwest side of the hill. We believe that the problem is getting worse due to the additional cracks that were encountered in that site visit.

You and I met on October 31, 2002 and you were going to check with the development group to see what the next step would be. We have not heard back from you and would like to know what the plans are.

If you would like to meet again on this issue, please let me know.

Sincerely,

A handwritten signature in black ink that reads "Rod D. Garrett". The signature is written in a cursive style.

Rod D. Garrett  
Director of Public Works
